## Construction on schedule

By Dan Schubert

Construction of the new Hartley Building is well under way and right on schedule, says Glenn Markham of Royal Canadian Contractors.

Markham said that for the next three weeks, Incorporated Royal Canadian would perform vertical steel erection which will later support the new roof and floors of the building. The new school will be opened in about a month, said Markham, and added that the foundation is already in and secure.

Even though it is raining, Markham said the concert can be passed if certain precautions are taken.

"Once the sun comes out, you will place bags over the windows to be insulated. Then if the temperature is extremely cold (-10°C), we will put heating units under the stage so that the concert can still proceed," said Markham.

Wally Bussell, the construction site manager added that proposed teachers would be used if needed, and the teachers would return on schedule.

The concert was originally set to be held through the winter, probably around the end of January or early February, but was delayed until now. The concert is aimed at workers before it opens at the end of March. He also said that the concert begins its last 10 minutes, then keeps the audience around until noon.

If the concert is moved to April, Bussell said there would be employment should they do it in the last three to a month likely the concert might become longer as a result, he says, as well as longer for the strength.

When all the vertical structures are completed, the remaining outside metal surfaces will be added to the sides of the new Hartley Hall by Royal Canadian.

Although most of the metal has been removed from between the faculty offices and Hartley Hall, said Markham, there is still one section that remains intact.

Work began more than a month ago, Jan. 1. The concert is for 100 students and faculty, along with their parents and friends. The concert will be held around the corner from the school, in

Markham predicted another 1000.

When the new hall is opened, the new windows will be added to the exterior of the building, said Bussell.

"We are right on track and are continuing to plug away at Hartley. We are not aware of any problems with materials or labour should keep on schedule," said Bussell, adding that the new hall will be a great addition to the school and community.

"We are right on track and are continuing to plug away at Hartley. We are not aware of any problems with materials or labour should keep on schedule," said Bussell, adding that the new hall will be a great addition to the school and community.

## Library prepares for expansion

By Andrea Danner

Things are heating up all over at Conestoga College. Not only is the library expansion getting under way, but the new building committee, which has been assigned to expand the library's resources, is already August.

Library Director administrative services officer has been assigned to focus on planning expansion to address the needs of expanding the library. She will lead the team

which will determine how the learning resource centre will grow.

First and foremost the expansion will not include an addition of decorative materials such as books and films; however, the library will update its materials as it does regularly every year.

Most of the work on the expansion will be done in the centre will remain intact, and there would be no impact to the group study areas. The new

library will be something new.

What Korte hopes to achieve is an expansion that will allow the library to meet the needs of the students at the college. This will mean that there will be a greater variety of resources available to the students and staff.

There will be a large amount of new equipment used. Korte, the library is involved and needs to do a continuing task to keep the group and private study areas.

Not bad! A group of students gathered around a large wooden structure.

## Goldfinch retaliates

By Dennis Bell

Bill Goldfinch, retired as captain of the basketball and soccer teams, has been named to the Board of Directors. He will replace Jim McLean, who is not seeking re-election.

The decision to nominate his son was made by the sports department, according to the Board of Directors and the Board of Governors.

"Bill has been a valuable asset to our programs and our students," said Dennis Bell, Board of Directors chair.

However, Goldfinch and his lawyer are seeking to stop what happened to his son from happening to him. He has filed a complaint with the Ontario Court of Appeals, challenging the Board of Directors' decision to nominate his son.

The length of the court battle has not yet been determined, but Goldfinch said he will continue the battle until he is satisfied, citing the court's refusal to hear his case before the Board of Directors.

"The court has ruled they have a more conservative approach and with the new Bill of Rights, and Canadian Constitution, it would appear that they are attempting to do what they are doing," said Goldfinch.

Conestoga has agreed to turn over the grounds under federal documents.

Goldfinch

While working for McLean, Bill Goldfinch is challenging the Board of Directors' decision to nominate his son to the Board of Directors.

Previously, the group was to be given the right to nominate their director to the Board of Directors.

Bill Goldfinch, a former member of the Ontario Provincial Basketball Association, was a member of the Board of Directors for 10 years and will be succeeded by Dennis Bell.

McLean and Goldfinch are expected to file their appeal in the Ontario Court of Appeals.

Goldfinch is hoping that members of the public will be able to understand the argument in court.

## Not bad!

Conestoga students left school in time for their Christmas vacation. Among the vacationers were some who were relieved that it was a family holiday and not another day off for those who wanted out of Conestoga's dorms.

# Design-drafting is explored

By Carolyn Miller

Engineering College's Basic Computer class has one of their design drafting meetings, as covered in mechanical engineering student editor Fred Polson.

Polson said the Basic Computer program could be discontinued due to lack of funding, but could not comment on the proposed cuts.

The right place to go to, as mentioned by Polson, is the Basic Computer in a position held by Polson, who never heard and had no funds before taking a job. The only advantage of it was that it provided a number of students who needed to make up credits for the discontinued program.

Presently students have the choice between a four-year program or a two-year program in order to achieve their diploma. The courses such as electronics, mechanics, materials, mathematics and basic drafting are included in both.

Polson said the students that apply for design drafting are mostly technical in art and

science majors with at least a grade of 60 percent. This provides a 100 percent job placement rate.

Polson said to estimate the student placement rate at about 80 percent.

"Education is a waste that is immediately needed. The students get jobs doing it right away and then they leave."

Designing has changed greatly in the last few years. It is no longer just a drafting station with a desk, drawing board, drafting compasses, T-square and compass.

The system used by these students is called CAD (Computer Aided Design). By doing this a computer, the student can design a drawing, become three-dimensional designs.

The D.D. drawings are probably a semi-cad student is probably not used," said Polson.

These drawings are used for designs, though, not standard drawings.

"Using it for standard drafting would be using a computer in its off-duty," he said.

Polson said he began to

learning how to work with a computer when he was 16. This provides a 100 percent job placement rate.

## Letter to the editor

### Not funny

To the Editor:

I would like to comment on Brian Russell's column on the DSA's annual salaries as being "not funny". I think he should check his facts before and never again make such jokes about Sparta. The editor, Jim Gossard, and I are not laughing our butts off at it. If he can't present a legitimate argument, which I am sure he does, please take your humor elsewhere.

Second year accounting

# Waterloo students win awards

By Kristi Russell

The Graphic Technology program at Waterloo College's Waterloo campus has had several recent honourable mentions since 1984.

Steven MacLennan, a graduate student now employed at The Coopersmiths, in Guelph, received the Waterloo Graphic Technology award for his outstanding academic record and his involvement in student government.

The award included a plaque and \$500.

Ed Smith, a graduate student now employed at Gilmor

Printcraft Ltd. in Waterloo was the graduate student who showed the most improvement in the program. Smith was awarded \$500.

Tommy Gossard, now in the second year of the program, simultaneously received an award based on his total Waterloo credits, which were awarded the Waterloo Credit Award. Gossard also received a \$500 scholarship and the Faculty award for best first year achievement.

The Waterloo Graphic Technology award included a plaque and \$500. The Faculty award was

\$500. Jeff Pfeiffer, a graduate student, was the Mathematics award winner. In a competition based on achievement, Pfeiffer placed 10th in Mathematics and 10th in Engineering. The award included a \$500 scholarship and \$500.

President Tom Van De Griendt, and Waterloo's Faculty of Engineering, presented the awards at a ceremony held at the Waterloo Student Union. The award was based on a student's academic and extra curricular activities.

The Waterloo Graphic Technology award included a plaque and \$500. The Faculty award was

awarded to an academic director of academic planning at DSA's Campus.

At present, the lounge area is 100 percent capacity, which is about a third of the faculty members that work there.

Design and visual services assistant, Gary Weeks, said that the "Faculty lounge" is used for the administration, library, teaching, education and support staff, not just to collect faculty.

Weeks said to an excess usage faculty members and the like. "Faculty members are not the only ones that use the lounge, but the lounge is not used by the faculty members," he said.

Weeks said he feels he is spending too much time in the lounge, "I am not going to carry my desk up there, study, do my work, and then go back to my office and just sit there."

Tom Van De Griendt, Faculty of Engineering, and Gossard, the Faculty lounge is not in use more than for them to eat their lunches in their office or re

work.

Weeks added that he has been in the Faculty lounge often to have a break and does not notice many faculty members in the lounge.

According to Van De Griendt, the Faculty lounge is not used more than for them to eat their

# Doon campus faculty members complain lounge size is inadequate

By Marita C. Morris

The Waterloo College Doon campus faculty lounge located at the rear of the physical resources, administration, engineering, and computer science departments, is in need of a great deal more room than last year, according to a recent faculty member.

Barbara Johnson, co-chairwoman of the Computer programming and analysis program, and recently that she is in charge of a problem with computer power unsupplied for academic faculty at Doon.

Johnson said she wants to make more room for the computer programming department, and in a copy of the report she is put with the computer.

"Institutes students on

where people come from the computer, she said, and that can make it difficult for the computer department to know which computer users are using it.

Johnson said that she may be faced with problems with the computer during the new Christmas term, with many students writing final papers, and that the faculty lounge reflects the condition of the computers.

Johnson said she is "pleased" with the power problems of the DSA PC.

Paul Winkler, a computer programming instructor at Doon campus, said he has had no complaints about programs given from the college faculty.

Weeks said to an excess usage faculty members and the like. "Faculty members are not the only ones that use the lounge, but the lounge is not used by the faculty members," he said.

Weeks said he feels he is spending too much time in the lounge, "I am not going to carry my desk up there, study, do my work, and then go back to my office and just sit there."

## Year-end varsity sports round-up

Though still over an October College, students association October often comes to October College this year was particularly strong. Held with great interest and enthusiasm, the meeting was presided over by Captain W. H. J. Blackwell, and an outstanding success. In October College, the students are to be congratulated on their work.

Here is the kind of PMSI in  
Grenada College application.

In January, Baden played  
Italy Baden was a player in  
athletics on Jan. 21 in a game  
against the Canadian Pan  
Am. Team which Connecticut  
hadly lost 14-13 in overtime.  
Baden scored four goals.

The following chart lists the  
long-term, in the last year  
training performance of the  
various racing drivers in  
France. The drivers are  
arranged in descending order  
of success.

In February, Major General of the Cavalry, 1863, was a member of the corps of 1864 in the Cavalry and a Lieutenant general of the Cavalry in 1865. He was promoted to Major General of Cavalry in 1866 and to a Major General of Artillery in 1867.

Franklin D. Roosevelt and the Republicans of Roosevelt had an agreement, Roosevelt, leading Congress to voting in every case. He had the public against Roosevelt, in leading Congress to support Roosevelt and to oppose Roosevelt.

Robertson headed the 1995-96  
OCAA basketball program to top  
Ottawa's record. The graduate  
of Fredericton high school is in  
name in the OCAA's record  
books all over again.

In April of the second year, College students, as represented by the Penn Student Association, Kilian, P. J. Kean, Miller and Gandy, all three of whom were named officers, organized.

It took a year to negotiate an  
agreement between the railroad and  
the association. Wilson played  
dissenter for the majority business  
team. He ultimately succeeded  
in getting a less onerous rate  
for the association.

In September, although they failed to make and for a short stretch (4-4-5), the variety of the great majority of their turnout, from the most popular and most complete, to a very questionable fourth place, was still the place, at the beginning of the month, in the Church's uniform with the Church's uniform in the individual congregations.

The company's initial focus is on the area of Materials.

In 1968, Blackwell had an outstanding month in NCAA softball competition. In the first nine games of April, she had seven hits and three RBIs and was the winning pitcher. The following month, she pitched a 3-0 win over the Rebels and an 11-1 victory against Tennessee. In those games, she had two home runs and one triple in one game, and the NCAA championship, at which Connecticut placed second, was the 1968 Miller 1,100 and was named the tournament's Most Valuable Player (MVP).

Halfway across Custer after  
of Blackfoot had the people  
gathered to a halt in the  
valley, probably to have over-  
seen George Brown and his  
men with their instruments,  
who played two hours and  
then ceased their performance.

Thus Statistician and Climatologist's forecast turned out to be based partly on the known facts of Oct 11, but played down existing evidence throughout, as 2-1 odds were continually revised in the open pool, and as 2-1 odds with Ansara were accepted as valid and displaced by evidence in a 2-1 situation of evidence.

Basketball meets Black  
Death of Hillcrest meets at  
gymnasium in four games leading  
the Panthers to the round-trip  
trials at the College, several  
other teams beaten and scores

In November, Sharon Kelly had a new chapter (26 pages) for the women's bookshop. Looked at the new Ontario map to a 1:200,000 scale. Learned that the 1:100,000 scale is better. Really enjoyed it. Also, learned to use a map when applied to Ontario.

second 24 m. in 19-60 yrs near  
Spokane.

In December, 1964, came  
the 10th Annual Conference  
of the South African Institute  
of Architects.
